Trade UP your TRACER

Reasons to upgrade now to the newest SureTrace™ Circuit Tracers

Ease-of-Use

- Operating Range 0 – 600V AC/DC de-energized (0 Volts) and energized to 600V.
- Super-bright OLED display (61-957) indicates a numeric value between 0 and 99, providing a quick and easy way to determine signal strength
- A variable pitch/tone audible indication assists in verifying signal strength
- Peak detection provides instantaneous signal strength feedback
- SureTrace™ Circuit Tracers feature the only rotating display in the industry. Regardless of the tracer’s position, the display will orient itself in an easy-to-read vertical position.

Performance

- Four defined ranges let you quickly select the proper sensitivity for your job, allowing you to quickly find a panel, breaker or circuit with the push of a button
- AA batteries provide 4 times the tracing power and are easily replaced in an upgraded battery compartment
- Battery life indicator displays % battery life remaining

Safety

- Designed for durability and safety
- CAT III 600V
- High energy fuse

*Circuit Tracers Eligible for Trade In:

Manufacturer	Description	Part #
